

# Girl Scout Gold Award Project

by Sahana Rajiv

← [Back to sahanarajiv.com](https://sahanarajiv.com)

Welcome to my comprehensive resource hub for my **Girl Scout Gold Award project: Building a LEGO Converter with Artificial Intelligence (AI)**. This page contains all the essential links and materials you need to explore my project, from the **demo videos** to the **final code implementation**, **pre-built models** and additional resources.

## Start Here

1) Link to My Comprehensive [User Manual](https://sahanarajiv.com)

## 2) My YouTube Seminar on How to Assemble a LEGO Model!

### [Watch the Video](#)

In this video, we will build a [10-layer LEGO duck using this instruction set](#) I created using my software.

### Step 1 (Beginner Level):

#### Download My Pre-built Instruction Kits and Start Building More Models!

Each folder contains the original **STereoLithography (STL) file\***, **PDF assembly instructions** for the **LEGO model**, and the final STL output. Perfect for getting started quickly with your own builds.

### [Download Models](#)

### [Click Here To Converting Using My Web App!](#)

### Step 2 (Advanced Level):

#### Download My Code from GitHub and Create New Models!

Access the complete **source code** and deployment files for the **web application**.

### [View Code](#)

### Step 3 (Master Level);

#### Learn More About How I Used AI to Build This Software and Make Your Own Modifications!

Explore the **technical journey** of building the **LEGO Converter** with AI.

### [Read Documentation](#)

## Learning Resources

To help you get started with the tools and techniques used in this project, I've compiled helpful tutorials and resources.

## YouTube Videos on Cursor

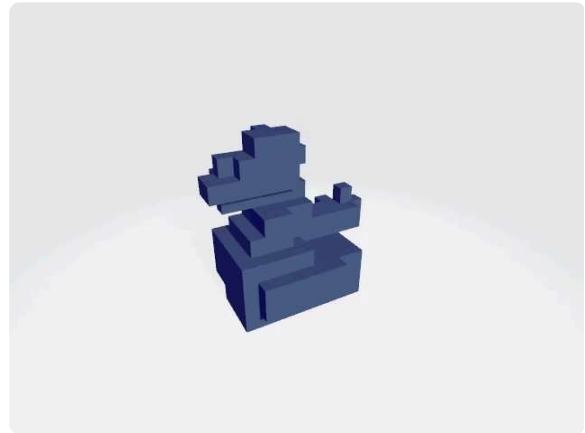

- [Cursor Tutorial Part 1](#)
- [Cursor Tutorial Part 2](#)

## Free STL File Websites

- [Thingiverse](#)
- [Cults3D](#)
- [Thangs](#)

*\*A Stereolithography (STL) file is a standard file format used for 3D printing and computer-aided design (CAD). It represents a 3D model as a series of connected triangles, describing only the surface geometry of a three-dimensional object without any color, texture, or other common CAD model attributes.*

# Build & Donate a LEGO Duck Kit

Make a difference by building a LEGO duck kit and donating it to a child in need! Follow the instructions to assemble your own kit, then donate it to Second Chance Toys to bring joy and creativity to children.

## Bricks Needed for the Kit:

- 1x1 bricks: 1 (pink/red color)
- 1x2 bricks: 5 (olive/gray color)
- 1x3 bricks: 5 (green color)
- 1x4 bricks: 6 (dark purple color)
- 1x6 bricks: 34 (purple color)
- 2x4 bricks: 5 (teal color)
- Total: 56 bricks

**[Download the complete assembly instructions](#)**

## Donate your kit to Second Chance Toys

**Second Chance Toys** is a nonprofit organization that collects and distributes gently used toys to children in need. Your LEGO duck kit donation will brighten a child's day and inspire creativity!
